

Your name: Sterling Wall

Boat's name: Kookaburra

Boat's location: Stevens Point, WI

Boat's date of manufacture (from your registration): I will need to find this. I know it is a Mark 3 and is mid 80's.

Number of windows (per side): 2

Rudder (fixed or pivoting): Pivoting

Anchor locker (shallow with molded inset for anchor): No, however there is a cut out in that same place for the jib to sit in. No anchor cutout and no door to close it off.

Mast make (Kenyon or...?): Dwyer

Swept back spreaders? (yes or no): Yes

Chain plates (Two sets of flat style chain plates or ...?) No chain plates, the standing rigging toggles connect to U bolt style mounts only.

Issues: No anchor light or antenna mount.

Solutions: We riveted an L bracket to place an anchor light at the top of the mast and installed an antenna on the top mast plate.
